To whom it may concern,

RE: INSTALLATION OF H2 MINUS – 130 OLD FOREST HILL ROAD

I would like to take this opportunity to thank you for bringing the H2 Minus technology to my building noted above. Your original estimate was for a savings of around 6% on my water consumption. Once installed your verification indicated a savings of almost 10%. This was much more than I expected.

In real terms, the total savings amounted to about \$2,500 per year which resulted in a tremendous pay back for me. More importantly, the \$5,000 cost for the H2 Minus valved resulted in an increase in value in my building of over \$60,000 immediately.

The installation of the value was simple and caused little if any disruption in my building. There also has been no issues with the value post installation as well. I have many clients in the apartment ownership and management business and I will recommend this device to all of them.

Yours truly,

Savoy Plaza Apartments
